PROJECTS

Personal Blog Site. This dynamic blog website features a responsive design with Bootstrap and a Flask backend for content management, user authentication, and database interactions. It prioritizes user friendly navigation and seamless cross-device compatibility. Here's the [LINK](#) for the site.

Selenium Projects. I have worked on several automation projects, including an Amazon price tracker, LinkedIn job application automation, and an Instagram follower bot, utilizing Selenium and BeautifulSoup libraries.

Password Manager. This is a Python project developed to locally store website usernames and passwords in JSON format. The user interface is created using the TKINTER library. For more Python projects, go through my [my GitHub repo](#)
